Last update: 10-11-2017

1. Abadi, F., Sahebi, I., Arab, A., Alavi, A., & Karachi, H. (2018). Application of best-worst method in evaluation of medical tourism development strategy. *Decision Science Letters*, 7(1), 77-86. [[link](#)]
2. Abolbashari, M. H., Hussain, O. K., Saberi, M., & Chang, E. (2017, August). Fine Tuning a Bayesian Network and Fairly Allocating Resources to Improve Procurement Performance. In *International Conference on Intelligent Networking and Collaborative Systems* (pp. 3-15). Springer, Cham. [[link](#)]
3. Ahmadi, H. B., Kusi-Sarpong, S., & Rezaei, J. (2017). Assessing the social sustainability of supply chains using Best Worst Method. *Resources, Conservation and Recycling*, 126, 99-106. [[link](#)]
4. Alhubaishy, A., & Benedicenti, L. (2017, May). Toward a model of emotion influences on agile decision making. In *Proceedings of the 2nd International Workshop on Emotion Awareness in Software Engineering* (pp. 48-51). IEEE Press. [[link](#)]
5. Askarifar, K., Motaffef, Z., & Azaami, S. (2018). An investment development framework in Iran's seashores using TOPSIS and best-worst multi-criteria decision making methods. *Decision Science Letters*, 7(1), 55-64. [[link](#)]
6. Chitsaz, N., & Azarnivand, A. (2017). Water Scarcity Management in Arid Regions Based on an Extended Multiple Criteria Technique. *Water Resources Management*, 31(1), 233-250. [[link](#)]
7. Ghaffari, S., Arab, A., Nafari, J. & Manteghi, M. (2017). Investigation and evaluation of key success factors in technological innovation development based on BWM, *Decision Science Letters*, 6(3), 295-306. [[link](#)]
8. Guo, S., & Zhao, H. (2017). Fuzzy best-worst multi-criteria decision-making method and its applications. *Knowledge-Based Systems*, 121, 23-31. [[link](#)]
9. Gupta, H. (2017). Evaluating service quality of airline industry using hybrid best worst method and VIKOR. *Journal of Air Transport Management*. [[link](#)]
10. Gupta, H., & Barua, M. K. (2016). Identifying enablers of technological innovation for Indian MSMEs using best-worst multi criteria decision making method. *Technological Forecasting and Social Change*, 107, 69-79. [[link](#)]
11. Gupta, H., & Barua, M. K. (2017). A novel hybrid multi-criteria method for supplier selection among SMEs on the basis of innovation ability. *International Journal of Logistics Research and Applications*, 1-23. [[link](#)]

Best Worst Method

A multi-criteria decision-making method

12. Gupta, H., & Barua, M. K. (2017). Supplier selection among SMEs on the basis of their green innovation ability using BWM and fuzzy TOPSIS. *Journal of Cleaner Production*, 152, 242–258. [[link](#)]
13. Gupta, P., Anand, S., & Gupta, H. (2017). Developing a roadmap to overcome barriers to energy efficiency in buildings using best-worst multi-criteria decision making methodology. *Sustainable Cities and Society*, 31, 244-259. [[link](#)]
14. Hafezalkotob, A., & Hafezalkotob, A. (2017). A novel approach for combination of individual and group decisions based on fuzzy best-worst method. *Applied Soft Computing*, 59, 316-325. [[link](#)].
15. Joshi, K. P., & Lohiya, N. (2016). Improved Seating Plans for Movie Theatre to Improve Revenue: An Integrated Best Worst. *Handbook of Research on Intelligent Techniques and Modeling Applications in Marketing Analytics*, 149. [[link](#)]
16. Mohaghar, A., Ghasemian Sahebi, I., & Arab, A. (2017). Appraisal of humanitarian supply chain risks using Best-Worst Method, *International Journal of Social, Behavioral, Educational, Economic, Business and Industrial Engineering*, 11(2), 259-264. [[link](#)]
17. Mou, Q., Xu, Z., & Liao, H. (2016). An intuitionistic fuzzy multiplicative best-worst method for multi-criteria group decision making. *Information Sciences*, 374, 224-239. [[link](#)]
18. Mou, Q., Xu, Z., Liao, H. (2017). A Graph Based Group Decision Making Approach with Intuitionistic Fuzzy Preference Relations, *Computers & Industrial Engineering*, 110, 138-150. [[link](#)]
19. Nafari, J., Arab, A., & Ghaffari, S. (2017). Through the Looking Glass: Analysis of Factors Influencing Iranian Student's Study Abroad Motivations and Destination Choice. *SAGE Open*, 7(2), 1-19. [[link](#)]
20. Pamučar, D., Gigović, L., Bajić, Z., & Janošević, M. (2017). Location Selection for Wind Farms Using GIS Multi-Criteria Hybrid Model: An Approach Based on Fuzzy and Rough Numbers. *Sustainability*, 9(8), 1315. [[link](#)]
21. Pamučar, D., Petrović, I., & Ćirović, G. (2018). Modification of the Best-Worst and MABAC methods: A novel approach based on interval-valued fuzzy-rough numbers. *Expert Systems with Applications*, 98, 89-106. [[link](#)]
22. Praditya, D., & Janssen, M. (2017, November). Assessment of Factors Influencing Information Sharing Arrangements Using the Best-Worst Method. In *Conference on e-Business, e-Services and e-Society* (pp. 94-106). Springer, Cham. [[link](#)]
23. Ren, J. (2018). Technology selection for ballast water treatment by multi-stakeholders: A multi-attribute decision analysis approach based on the combined weights and extension theory. *Chemosphere*, 191, 747-760. [[link](#)]
24. Ren, J., Liang, H., Chan, F.T.S., (2016). Urban sewage sludge, sustainability, and transition for Eco-City: Multi-criteria sustainability assessment of technologies based on best-worst method, *Technological Forecasting and Social Change*, 116, 29-39. [[link](#)]
25. Rezaei, J. (2015). Best-worst multi-criteria decision-making method. *Omega*, 53, 49-57. [[link](#)]
26. Rezaei, J. (2016). Best-worst multi-criteria decision-making method: Some properties and a linear model, *Omega*, 64, 126-130. [[link](#)]

Best Worst Method

A multi-criteria decision-making method

27. Rezaei, J., Hemmes, A., & Tavasszy, L. (2017). Multi-criteria decision-making for complex bundling configurations in surface transportation of air freight. *Journal of Air Transport Management*, 61, 95–105. [\[link\]](#)
28. Rezaei, J., Nispeling, T., Sarkis, J., & Tavasszy, L. (2016). A supplier selection life cycle approach integrating traditional and environmental criteria using the best worst method. *Journal of Cleaner Production*, 135, 577-588. [\[link\]](#)
29. Rezaei, J., Wang, J., & Tavasszy, L. (2015). Linking supplier development to supplier segmentation using Best Worst Method. *Expert Systems With Applications*, 42(23), 9152-9164. [\[link\]](#)
30. Sadaghiani, S., Ahmad, K. W., Rezaei, J., & Tavasszy, L. (2015, April). Evaluation of external forces affecting supply chain sustainability in oil and gas industry using Best Worst Method. In *Gas and Oil Conference (MedGO), 2015 International Mediterranean* (pp. 1-4). IEEE. [\[link\]](#)
31. Sadeghi, S., Rasouli, N., & Jandaghi, G. (2016). Identifying and prioritizing contributing factors in supply chain competitiveness by using PLS-BWM techniques (case study: Payam shoes company). *World Scientific News*, 49(2), 117. [\[link\]](#)
32. Sahebi, I. G., Arab, A., & Moghadam, M. R. S. (2017). Analyzing the barriers to humanitarian supply chain management: A case study of the Tehran Red Crescent Societies. *International Journal of Disaster Risk Reduction*, 24, 232-241. [\[link\]](#)
33. Salimi, N. (2017). Quality assessment of scientific outputs using the BWM. *Scientometrics*, 112, 195–213. [\[link\]](#)
34. Salimi, N., & Rezaei, J. (2016). Measuring efficiency of university-industry Ph. D. projects using best worst method. *Scientometrics*, 109(3), 1911–1938. [\[link\]](#)
35. Salimi, N., & Rezaei, J. (2018). Evaluating firms' R&D performance using best worst method. *Evaluation and Program Planning*, 66, 147-155. [\[link\]](#)
36. Serrai, W., Abdelli, A., Mokdad, L., & Hammal, Y. (2016, June). An efficient approach for Web service selection. In *Computers and Communication (ISCC), 2016 IEEE Symposium on* (pp. 167-172). IEEE. [\[link\]](#)
37. Serrai, W., Abdelli, A., Mokdad, L., & Hammal, Y. (2017). Towards an efficient and a more accurate web service selection using MCDM methods. *Journal of Computational Science*, 22, 253-267. [\[link\]](#)
38. Shojaei, P., Haeri, S. A. S., & Mohammadi, S. (2017). Airports evaluation and ranking model using Taguchi loss function, best-worst method and VIKOR technique. *Journal of Air Transport Management*. [\[link\]](#)
39. Sofuoglu, M. A., & Orak, S. (2017). A Novel Hybrid Multi Criteria Decision Making Model: Application to Turning Operations. *International Journal of Intelligent Systems and Applications in Engineering*, 5(3), 124-131. [\[link\]](#)
40. Sofuoglu, M.A., Arapoglu, R.A., & Orak, S. (2017). Multi objective optimization of turning operation using hybrid decision making analysis. *Anadolu University Journal of Science and Technology A- Applied Sciences and Engineering*, 18(3), 595-610.
41. Tian, Z. P., Wang, J. Q., Wang, J., & Zhang, H. Y. (2018). A multi-phase QFD-based hybrid fuzzy MCDM approach for performance evaluation: A case of smart bike-sharing programs in Changsha. *Journal of Cleaner Production*, 171, 1068-1083. [\[link\]](#)

Best Worst Method

A multi-criteria decision-making method

42. Torabi, S. A., Giah, R., & Sahebjamnia, N. (2016). An enhanced risk assessment framework for business continuity management systems. *Safety Science*, 89, 201-218. [\[link\]](#)
43. van de Kaa, G., Kamp, L., & Rezaei, J. (2017). Selection of biomass thermochemical conversion technology in the Netherlands: a Best Worst Method approach. *Journal of Cleaner Production*, 166, 32-39. [\[link\]](#)
44. van de Kaa, G., Scholten, D., Rezaei, J., & Milchram, C. (2017). The Battle between Battery and Fuel Cell Powered Electric Vehicles: A BWM Approach. *Energies*, 10(11), 1707. [\[link\]](#)
45. Wan Ahmad, W.N.K., Rezaei, J., Sadaghiani, S., Tavassz, L.A. (2017). Evaluation of the external forces affecting the sustainability of oil and gas supply chain using Best Worst Method, *Journal of Cleaner Production*, 153, 242–252 [\[link\]](#).
46. Wang, Z., Xu, G., Ren, J., Li, Z., Zhang, B., & Ren, X. (2017). Polygeneration system and sustainability: Multi-attribute decision-support framework for comprehensive assessment under uncertainties. *Journal of Cleaner Production*, 167, 1122-1137. [\[link\]](#)
47. Yang, Q., Zhang, Z., You, X., & Chen, T. (2016). Evaluation and classification of overseas talents in China based on the BWM for intuitionistic relations, *Symmetry* 2016, 8(11), 1-18. [\[link\]](#)
48. You, X., Chen, T., & Yang, Q. (2016). Approach to Multi-Criteria Group Decision-Making Problems Based on the Best-Worst-Method and ELECTRE Method. *Symmetry*, 8(9), 95. [\[link\]](#)
